**Note for installation and commissioning:**

- a. Railways/RailTel will finalise the location of videowall.
- b. The installation of videowalls are not be viewed as just hanging a screen on a wall. The display must be integrated into the concourse/ relevant area design if it is to be installed in a new space, or that careful thought be given to how it should be integrated into an existing space. When planning for locations of screens, people traffic movements and other environmental factors that negate the effectiveness of videowalls will be taken into account. For example, a bad location where the sun comes through the window & can't view screen as a result.
- c. Sightlines should be considered when determining where to mount screens to help catch attention. Adequate ventilation for heat dispersion, no seepage/leakage from walls, the area should be properly covered and secured and moist free.

- d. Connection from a designated power source/per videowall at the stations/locations.
- e. The connection to network will be through media players provided by RailTel. Media player is not in the bidders scope, however, the bidder shall make provision for space to install Media Players inside the back of videowalls.
