10. Scope of Work

10.1. Brief overview

Internet in India is largely mobile internet with a high percentage of them on 2G and 3G while RailTel had sought to bridge the Digital Divide. It was inadvertently bridging the experience divide of the internet where millions of users experience fast access to internet for the first time.

Usage statistics show significant pent-up demand for connectivity, amongst train commuters in stations covered by the station Wi-Fi project who have used the service. With unconstrained, free high-speed Wi-Fi connectivity, an average user consumes 343 MB in an average 30-minute data session. This is much higher than what we observe on an average 3G connection in the country currently, around 30MB per user per day. It is also important to note that the usage of 300MB using the Station Wi-Fi is just for a 30-minute session, compared to the usage of 560MB for a Reliance Jio user for an entire day.

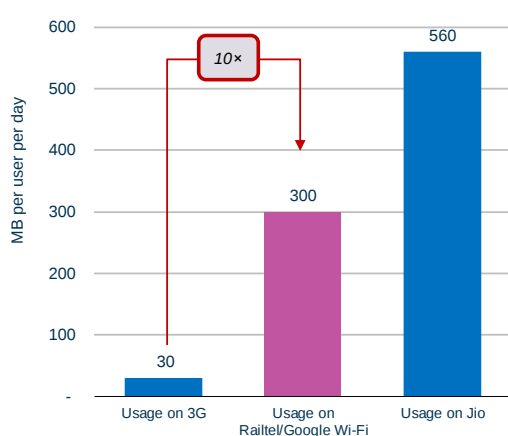

Figure: Internet usage on unfettered fast Wi-Fi compared to Jio and 3G users in India [Source: Analysys Mason, 2017, Ipsos Connect]

It is estimated that 20000 users everyday are first time users of the internet and there are very heartwarming stories of how the station Wi-Fi has helped to transform lives.

A porter clearing Kerala public service commission examination studying at station using RailWire Wi-Fi, a mother who is an auto driver by profession visiting railway station for using Wi-Fi to update her knowledge to teach her son, Cancer patients from economically weak section coming to Mumbai station to use Wi-Fi for entertainment, a Fashion Designing student using station Wi-Fi to sell her creation or a cafeteria manager at Bareilly using RailWire Wi-Fi to keep track of trains for planning food preparation for his café to offer faster service and reduce wastage – RailWire Wi-Fi is surely helping hundreds of people to fulfill their dreams.

10.2. Opportunity to Monetize

The Wi-Fi has been very well received by the public at large and has been popular with the public even when the mobile industry had launched unprecedented freebies. The key statistics are as given below:

Category	Number of stations	Projected annual impressions
Wi-Fi available stations	2215	106394215
Wi-fi implementation under process and will be provided as and when completed	4161	208381785
Wi-Fi available stations, but will be provided for monetisation from 29.05.2020	415	306392089
